Who owns English?

1 More people speak English than any other language, but according to English language expert David Crystal, non-native speakers now outnumber native speakers by three to one. "There's never before been a language that's been spoken more as a second language than a first," he says. By the end of last year, the number of adult English speakers in Asia had reached 350 million. And according to the British Council, in ten years' time 2 billion people will study English and about half the world's population will speak it.

2 Why such enthusiasm for English? In a word, jobs. "We always tell students they need two things to succeed – English and computers," says Chetan Kumar, manager of a language school in Delhi. For the middle classes in India, English can mean a prized job in a call centre. And the story is the same in other parts of the world. At a Toyota factory in the Czech Republic, English was chosen as the working language of the Japanese, French and Czech staff. Many other multinational companies, like Samsung and LG.Philips, have started moving towards an English-only email policy. Technology is a big factor in all this change – 80% of the world's electronic information is stored in English.

3 The way that people study English is also changing. In South Korea, for example, the national government has been building English immersion schools all over the country, where teenagers live in an all-English environment for up to four weeks at a time. In these 'English villages', students check into their accommodation, go shopping, order food, go to the bank, take cooking classes or acting lessons – all in English. And they seem to enjoy the experience – when we visited one acting class, a student was pretending to be the film star Orlando Bloom, to the obvious amusement of his classmates.

4 However, these new English speakers aren't just learning the language – they're changing it. There are hundreds of different types of English in the world today, such as 'Hinglish', the Indian mix of Hindi and English. New words are being invented every day all over the world. As David Crystal says, "No one owns English now. What happens to it is on the shoulders of all of us."

**Help with Grammar: Uses of auxiliaries**

### AUXILIARIES IN VERB FORMS

**a)** Look again at Tim and Mia's sentences in 3. Name the verb forms in **blue**.

**b)** Which of the verb forms in **blue** in 3 have auxiliaries? Which two verb forms don't have auxiliaries?

**c)** Complete these rules with be, do or have.

- We make all continuous verb forms with: __________ + verb + ing.
- We make all perfect verb forms with: __________ + past participle.
- We make all passive verb forms with: __________ + past participle.
- In the Present Simple and Past Simple we use a form of __________ to make questions and negatives.

**TIP!** We also use modal verbs (will, would, can, could, etc.) as auxiliaries: **'ll** (= will) do my best.

**d)** Check in G1.2 p115.

### OTHER USES OF AUXILIARIES

**a)** Look at these other uses of auxiliaries. Match the phrases in **pink** in 3 to a–f).

**Under examination**

Jeremy Harris looks back on his experiences of school exams.

It's been years since I last did an exam, but the memories of my O Levels* are still disturbingly fresh. I remember staying up all night before my maths exam, trying to learn dozens of equations by heart. The next day I avoided sitting next to my friends on the school bus and refused to talk to anyone outside the exam hall in case they made me forget everything I'd learned. When the teacher finally allowed us to pick up our pens, I immediately wrote down the equations in case I might need them during the exam. I didn't, of course, but I still have nightmares about the whole experience.

Back then I never stopped to think if exams were a good idea, but now that my twin daughters are doing their GCSEs*, I'm beginning to wonder whether exams are actually worth doing at all. Why do we still force kids to sit in an overheated gym and write until their arms fall off? Is a three-hour memory test really a good way to find out how much children know? Kids always end up forgetting almost everything they learn at school anyway. (Can you remember the second law of thermodynamics or who invented the light bulb? I thought not.) Personally I regret spending so much time at school learning things I've never needed to know since — and these days you can find out everything on the Internet anyway.

Of course, I still encourage my daughters to take their GCSEs seriously and I expect them both to continue studying next year. Emily hopes to become a journalist and I'm trying to persuade Julia to go to medical school. They're both very bright, but they find it hard to concentrate. They usually study for half an hour and then stop to call their friends or watch TV. However, we all know that qualifications help people get jobs, and a graduate in the UK will earn nearly twice as much as someone who left school at 16. So I pretend to believe that exams are a good idea, and I always remember to wish my daughters luck before each one.

By the way, I did manage to pass my maths O Level, but since then nobody's ever asked me to do calculus or draw a graph. The way I see it, if you need to add up a few numbers, try using a calculator. So maybe it's time to stop testing how much children remember and teach them to be better human beings instead.
